

Freezer-by-freezer summary: DCC's recorded weight, Metrc tag, source, and Metrc weight

Compiled from the exhibits Euphoric Life submitted at the February 2026 hearing (Respondent Exhibits 2–6, admitted; certified OAH clerk's record pp. B7–B31) as summarized in the Declaration of Aiden Rafii submitted with the writ petition in Santa Clara County Superior Court, No. 26CV489817 (March 2026), ¶ 10. DCC's weights are from the Initial Embargo Notice [item 05a]. This is a licensee-prepared summary; the underlying manifests and package histories are items S2, S3 and S4.

Notes. (1) "Difference" is DCC's recorded weight minus the Metrc weight, with the percentage taken against the Metrc figure. DCC's regulations define a "significant discrepancy" in inventory as "a five percent difference between the licensee's physical inventory and the inventory recorded in the track and trace system" (Cal. Code Regs., tit. 4, § 15034). Six of the eight flower freezers are within five percent; Freezer 6 is at about six percent and Freezer 2 at about fifteen percent. (2) DCC's April 29 weights were taken on site with the material in its bags. For Freezer 2, Euphoric Life's position at the hearing was that packaging weight was not deducted (its Exhibit 3: "investigators have continued to ignore tare weights"). The Freezer 9 figure includes the 23 glass jars. (3) For Freezers 3, 4, 6 and 7, part of the same Metrc package had been processed or sold before or after the embargo; the Metrc weight shown is the remaining package weight. (4) The ALJ did not accept this reconstruction; see the Proposed Decision, Findings 26–30 and Legal Conclusion 10 [item 11a]. (5) DCC's August 7, 2025 determination states DCC "cannot confidently source" the frozen flower and the concentrate [item 07a].
